TemitroniK
A TJM Electronics Brand

LED INNOVATION

Size MATTERS in LED Board Assembly.

(215) 788-2278 CALL NOW

LED Board Assembly

TemitroniK assembles LED boards of any shape and size up to 460mm (18.11") wide to 1200mm (47.24") long for incorporation into lighting fixtures. We can turn any LED fixture design into a driver-less device or make it high efficiency.

IoT Controls

In todays automated environment, control, monitoring, automation, and remote sensing of devices is becoming an important functionality. TemitroniK can integrate and work with existing IoT controls.

Turnkey Solutions

TemitroniK has developed a strategic partnership model with experts in their fields to provide complete lighting solutions to our customers with a single point of contact for project management.

ABOUT US

TemitroniK, a brand of TJM Electronics, is a leading LED board contract manufacturer in the USA. Using smart automated assembly lines, we offer custom LED board solutions that include AC and DC LED modules and compatibility with commercial IoT controls.

Our TEMIBOARD sets a brand new precedent in LED board assembly. It includes standard features that cover the majority of LED fixture manufacturers' needs right out of the box.

If you need a custom board, our in-house team of LED experts will work with you to create the ideal solution. We focus our resources on providing full and complete turnkey solutions in a streamlined, timely fashion.

With TemitroniK, you'll receive professional support, innovative solutions, and a high-quality final LED board product.
