

# Meet the TEMIBOARD.

The only  
LED BOARD  
you'll  
EVER NEED.

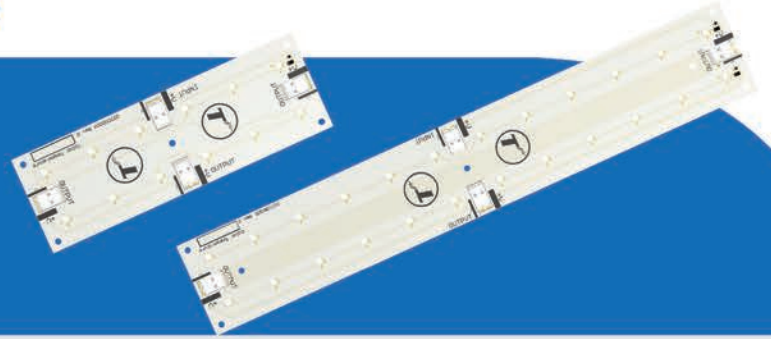

**TEMIBOARD** is available in six standard sizes, constant voltage or constant current, six color temperatures, 1x1 or 2x2 inch LED grid, connects together to create any size, and is dimmable.

**OR BUILD YOUR OWN CUSTOM BOARD!**

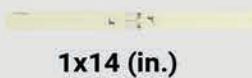

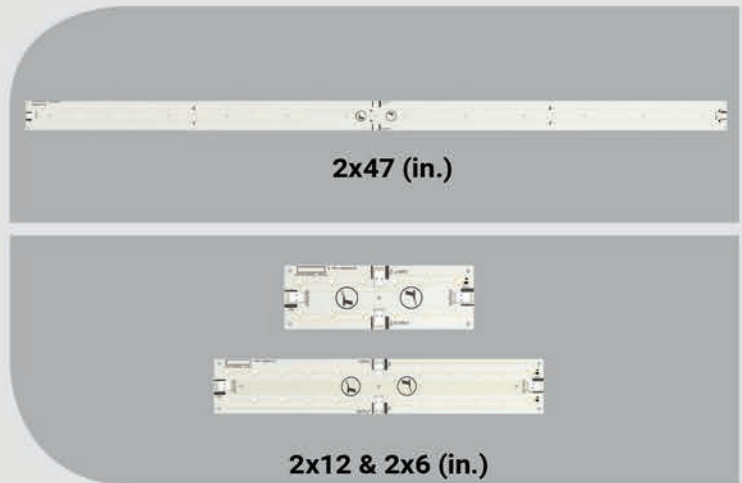

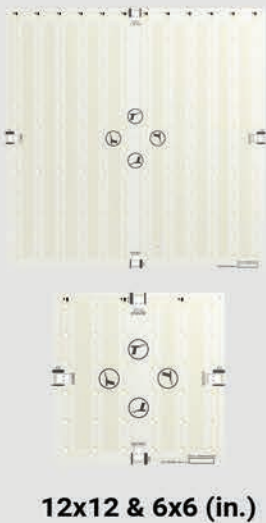

# TEMIBOARD

Six standard options:

|                     |  |                   |                               |
|---------------------|--|-------------------|-------------------------------|
| <b>Board Sizes:</b> | 2x6, 2x12, 6x6, 12x12, 14x47 & 2x47 (inches) | <b>LED Grid:</b>  | 1x1 or 2x2 (inches)           |
| <b>Color Temp.:</b> | 2000K, 2700K, 3000K, 4000K, 5000K, & 6500K   | <b>Lumens/SF:</b> | Varies by CCT and input power |
| <b>Power:</b>       | Constant Voltage or Constant Current         | <b>Dimmable:</b>  | Yes                           |

Most standard fixtures are exactly 4' or 48" long, so our standard LED boards are 47" so they fit. However, if you are connecting your boards back to back, use this extender board to keep your LED grid consistent and lighting uniform.

Need a custom solution?

**BUILD A BOARD.**

- Any shape or size
- 3030 or 2835
- Any CCT or CRI
- Any lumen output
- Dimmable
- Private label solutions
- Any application

Temitronik can custom build a TEMIBOARD to fit your cost per square foot needs.
