

SIZE MATTERS

in **LED board** assembly

When it comes to making things bigger and better in today's LED world, Temitronik is leading the way.

We value assemble and manufacture LED boards up to 460mm (18.11") wide and 1200mm (47.24") long.

TURNKEY SOLUTIONS

FOR ALL YOUR LIGHTING NEEDS

\\ LED BOARDS

Custom manufactured LED boards of any shape and size up to 460mm (18.11") wide and 1200mm (47.24") long

Bigger boards reduce the costs of labor and mechanical assembly, decrease component parts and failure rates, produce better consistency of light, and eliminate dark spots.

AC or DC driven

Turn any LED fixture design into a driver-less device or increase efficiency up to 219 lm/W.

Compatible with commercial IoT controls

Manage, monitor, automate, and control your environment.

\\ WHY CHOOSE US?

TemitroniK gets it right the first time, saving our clients the expense and headaches of poorly organized and executed lighting projects. We focus our resources on complete turnkey solutions in a streamlined, timely fashion. We are designed to be flexible so if the ideal solution is not part of our standard offering, we will customize to provide the ideal solution.
